To Whom It May Concern:

I highly recommend Yishai Rasowsky for various python programming roles – data science, tools/apps development or algorithmic related tasks.

I was Yishai's direct manager for the past 6 months at smrt. Yishai was responsible for developing our algorithms for automatically extracting specific terms from PDF contracts and for developing tools for visualizing the results and statistics.

Yishai displayed a high level of analytical thought, logic, problem solving, coding and getting down into the details.

In addition to all, Yishai is a great team player, highly motivated and eager to learn and develop overtime to acquire new skills and improve the existing ones. Please let me know if I can provide any more information to strengthen my recommendation.

Sincerely,

Yoel Krupnik
